		Claims		NO
	Inventive step (IS)	Claims	1-6	YES
		Claims		NO
	Industrial applicability (IA)	Claims	1-6	YES
		Claims		NO

- 2. Citations and explanations (Rule 70.7)
 - 1. This report makes reference to the following document:
 - D1: US 6 230 281 B1 (CAIRNS SHAUN ET AL), 8 May 2001 (2001-05-08)
 - 2.1 INDEPENDENT CLAIM 1

D1, which is considered to represent the closest prior art, discloses (the references in parentheses are to that document) a process for operating a communication terminal (column 14, lines 65-66), in which process the terminal is assigned to a second control unit (page 15, lines 4-8) when the control unit assigned to the terminal fails (page 15, lines 1-3).

The subject matter of independent claim 1 differs from D1 in that the terminal is assigned to the second control unit only after a digital signature has been positively verified.

The present invention can therefore be considered

International application No.
PCT/EP2004/003131

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

to address the problem of securely assigning the terminal to an alternative control unit after the failure of the control unit to which it was previously assigned.

None of the prior art documents discloses this solution to the stated problem. Consequently, the subject matter of claim 1 meets the requirements of PCT Article 33(2), 33(3) and 33(4).

2.2 INDEPENDENT CLAIM 6

Claim 6 defines an equivalent control program and therefore also meets the requirements of PCT Article 33(2), 33(3) and 33(4).

2.3 Claims 2-5 are dependent on claim 1 and therefore also meet the PCT novelty and inventive step requirements.
